    Scarlet Fever..... 4

    Erysipelas..... 1

    Measles..... 18

**TUBERCULOSIS**

    New cases reported

        1 Male 1 Female..

Deaths Nil

Both notifications were Pulmonary Tuberculosis

Diphtheria Immunisation :- (to 31st Decr 1942)

    Children immunised under 5 years..... 87.7%

    Children immunised 5 to 15 years..... 71.6%

The Sanitary circumstances of the area have not changed since my last report, water supply and general services are satisfactory. Sanitary defects are attended to as far as circumstances permit and there is little complaint.

There has not been any extra-ordinary incident of disease during the year and nothing calling for special reference.

Many persons who were evacuated to this area have now returned to their respective districts, and the estimated population is some 147 less than the estimated population a year ago.

Yours obediently,

*Richard Dainton*

Medical Officer of Health
